Consumables

Fruit and vegetable nets

Our fruit and vegetable nets consist of high-quality cellulose fibers, making them fully biodegradable.

They offer an eco-friendly alternative to traditional plastic nets.

Characteristics

- ✓ Are fully biodegradable, can be composted or recycled
- ✓ High-quality, strong and resistant

Benefits

Product presentation

With different colors, strengths and diameters, we offer various options to meet every packaging need.

Compostable

The nets are made of cellulose, derived from wood pulp, allowing consumers to compost the nets at home.

Packaging

There are multiple packaging options, including sleeves, on rolls and loose in a box, to optimize production.

Tailor-made fruit and vegetable nets to improve your production efficiency

Sleeves
