

Cardboard Packaging

Pressed Board Tray[®]

Discover our Pressed Board Trays®, perfect for frozen food and food service applications. These trays are mainly made of renewable material compatible with most recycling systems in Europe.

Pressed Board Trays® can be safely heated in both conventional ovens and microwaves. The exterior of the trays can be fully customized to your requirements.

Characteristics

- ✓ Fully adaptable to your product and market needs
- ✓ Powerful advertising medium due to fully printable cardboard

Applications

-  Chilling
-  Heating
-  Freezing

Benefits

Active packaging

The technology allows the use of specially colored laminates and printed films.

Material replacement

Pressed Board Trays® are increasingly replacing plastic trays.

Sustainability

90 to 100% of the material comes from renewable sources.

Powerful branding

Fully printable for attractive branding and communication.
